Designed for saving energy

When you choose Liniar, not only are you assured of a high-quality product, but you'll be also be taking advantage of the most technically advanced range available in the UK.

PVCu windows may look similar – but it's the bits you don't see, tucked away inside the frames, that make a huge difference to how the windows perform, and how much energy they save – or waste – over their life cycle.

First introduced to the UK in the early 1980s, PVCu (or UPVC as they were known then) windows were unattractive and bulky – and only available in white. Being more cost effective to produce than alternative materials, they were soon used extensively in new buildings all over the country.

Most other PVCu window systems have been updated since then – but Liniar is the only range to have been designed completely from scratch combining extensive industry experience with the most modern window technology.

Launched in 2008, Liniar frames are not only beautifully slim and available in a huge choice of styles, colours, and finishes – they contain a huge number of hidden features to make them the most energy efficient frames you can choose.

New for 2025 our Sentry Windows and Doors now come Intelligent ready as standard, scan the QR Code below for a quick demonstration, see inside for full product availability.

The Sentry Surveillance System

with optional 10 year mechanical warranty subject to application and approval

Approved by **Yale** and supported and approved by **Total Hardware**, we are delighted to bring to you the "Sentry Surveillance, Intelligent Windows and Doors".

Your new windows and doors will come intelligent ready as standard, with Sentry Surveillance locking mechanisms and sensor carriers fitted ready for you to configure, resulting in a complete surveillance system for your property.

The system has been developed by Yale; however Total Hardware have worked on a new "Quadlock" twin cam SBD device that will see an overhaul to our suit of locking devices.

Once you've purchased your hub and sensor kits, download the free App from the App store or Google, once you have set up your system, this is then free to use with no subscriptions, using the dedicated app, the system is Geofenced, once your windows and doors have been enabled, your phone will alert you, if you break the perimeter, should you have left one of your windows or doors open. Whether walking the dog or driving to the shops, you'll be safe in the knowledge you can check that your home is secure.

For more information on the full system, login to Yale direct to take a look around at www.yalehome.co.uk/senscheck-door-and-window-sensors

[Click here for
a video on
Quadlock](#)

Easy to install, Sentry Door and Window Sensors sit seamlessly within your Yale smart doors and windows. Check-in on the status of your home, all through the touch of a button.

Sentry works via the 'Yale Home' App, allowing you to:

- Check if your doors are open, closed, locked or unlocked.
- Check if your windows are open, in the vented window position or closed.
- Arm or part-arm your home.
- Get reminders via geo-fencing alerts.
- Receive tamper alerts.
- Receive chime notifications.
- Works with Amazon Alexa, Google Assistant and Philips Hue.
- Add additional Sync Alarm Accessories to make the ultimate home security system.

[Click here for
a video overview](#)

Please note, Bi-Folding Windows, Bi-Folding Doors, Tilt and Turn Windows, Stable Doors and Patio Doors are currently under development with Yale, however you can retrofit face fixed sensors which will enable you to upload these into your App for a full complement of products in your home. Please note, these products only display open and closed positions in your App. Available direct from Yale via the links in your QR Codes located inside your windows and doors.

Sentry Door Lock

Check the status of your home, anytime, anywhere.

Designed, developed and tested in the UK to Yale's exacting standards, this lock faultlessly delivers high-performance security, improved ease of use and an impressive service life.

Complementing a wide range of applications including aluminium, PVCu, and composite doors, the Sentry Door Lock offers fantastic versatility. Providing PAS24 security as standard when incorporated as part of a door set, it boasts the reassurance, reliability and outstanding features expected from Yale – the world's favourite security brand, securing homes for over 175 years.

The Sentry Door Lock hook and pin unit has been carefully positioned within 100mm of the pre-compression rollers.

Pre-compression rollers designed to assist with draught and weatherproofing.

Sprung and unsprung centre cases to suit front and back door applications, now with centre anti-separation hook as standard.

Easy to use push-in latch snib feature to prevent accidental lock-outs. Plus, reversible latch for easy handling.

Casement Windows

Still the most popular choice for homes all over the UK, Sentry casement windows offer total versatility and either classic or contemporary style.

This traditional British window style offers slim sight lines to let in maximum light. It's available in a wide choice of configurations, including top or side hung windows, so you can personalise each window to your requirements. Adding moulded sash horns gives Sentry casement windows the appearance of traditional vertical sliders – or for additional character you can add astragal or Georgian bars to your windows.

You could also add coloured or bevelled glass, and there's a wide range of colours and finishes to choose from. With matching cills and either traditional or contemporary handles, the choices are almost endless.

Liniair's patented bubble gasket is used in all products and delivers a continuous seal – even in the corners – resulting in draught-free, weather proof and leak-free windows, all with high security features.

Size Limitations

The maximum sizes stated below (mm) are based on 28mm 4-20-4 standard double glazed units within frames manufactured to the reinforcement guidelines.

CASEMENT TOP HUNG - {SASH SIZE}:
1265 w x 1342 h

CASEMENT SIDE HUNG - {SASH SIZE}:
715 w x 1342 h

Whilst we have the ability to manufacture outside these recommendation, please note we do so when asked but disclaim these on performance, therefore any sizes outside the maximum recommendations are excluded from the mechanical warranty.

Flush Sash Windows

Now available in two options; our current 70mm casement flush sash window is now complimented by the all-new Resurgence double-rebated 80mm Flush sash window system, the double-rebated weather seal and patented co-extruded bubble gasket ensure a draught-free, weatherproof window.

Resurgence is The UK's first PVCu double-rebated flush sash window, Resurgence offers the ideal solution for both modern and character properties. When Resurgence is installed with a woodgrain foiled finish, it's difficult to distinguish from a traditional timber window, the "Timber" welded look joints are complimented thanks to a comprehensive lamination process, Resurgence is foiled on interior surfaces too, providing a realistic through colour look, even when the window is open.

Personalisation and Resurgence

Resurgence is available in a stunning range of colours, including woodgrain foils such as the popular Anthracite or Agate Grey, Antea Oak and Sheffield Oak. It can also be fitted with either double or triple glazing for different thermal and acoustic options.

Handle Colour Options

Size Limitations

The maximum sizes stated below (mm) are based on 28mm 4-20-4 standard double glazed units within frames manufactured to the reinforcement guidelines.

Ecoframe windows and doors are unlike anything else on the UK market today.

Based on Linar new and innovative Zero 90 platform, not only do they help developers, housebuilders and specifiers meet Future Homes Standard well ahead of schedule, they offer huge energy savings to the millions of homes that fail to meet current insulation standards – delivering comfort and quiet in a sustainable, cost-effective solution.

With a suite containing the UK's first Passivhaus certified PVCu casement window, the Ecoframe range leads to a reduction in carbon in the construction of homes and buildings, as well as offering Whole Life Carbon reductions as it's made in Britain.

And it's not just for new builds Ecoframe is accessible to everyone. An innovative rebated design means Ecoframe windows can easily be retrofitted into existing buildings to replace older windows – helping everyone on their journey to Net Zero.

Bi-Fold Windows

An increasingly popular choice, Sentry bi-fold windows fold back in a concertina style to offer a full-width opening and maximum air and light.

Linlar bi-fold windows are popular for use in conservatories and orangeries and are also ideal for the commercial sector. During the summer months, they can transform a café or restaurant giving any establishment an outdoor, open feel, while being secure and child-friendly. If a bi-folding door isn't an option for your home, a bi-fold window can offer similar benefits whilst allowing you to retain valuable wall space inside your property. Made to measure, a Linlar bi-fold window can be manufactured up to 4 panes wide and 1800mm high.

Tilt & Turn Windows

If you love opening your windows wide to let in fresh air, but worry about security, why not consider the European style of a Linar tilt and turn window?

The 'open in' style gives great options for cleaning from within (in the turn position) and secure ventilation (in the tilt position).

Offering a greater scope for larger openings than a traditional casement window, Linar's tilt & turn windows are ideal for high-rise as well as low-rise applications, and thermal performance is helped by the larger panes of glass. Astragal or Georgian bars can be added, and your installer will be able to show you the wide choice of coloured and patterned glass on offer to you.

As with casement windows, Linar's patented bubble gasket delivers a continuous seal around the edges, resulting in draught-free, weatherproof, and leak-free windows with U-values as low as 0.9 W/m²K.

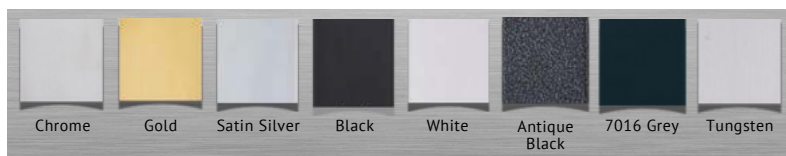

Size Limitations

The maximum sizes stated below (mm) are based on 28mm 4-20-4 standard double glazed units within frames manufactured to the reinforcement guidelines.

ILT & TURN VENT SIZE - {SASH SIZE): 1402 w x 1402 h

Whilst we have the ability to manufacture outside these recommendation, please note we do so when asked but disclaim these on performance, therefore any sizes outside the maximum recommendations are excluded from the mechanical warranty.

Is my home safe and secure?

Know the answer, at home or away, with Sentry Intelligent Windows and Doors, approved by Yale. Sentry Intelligent Sensors put you in control of your home security, monitor the status of your doors and windows from anywhere, or at any time, via the Yale Smart Living Alarm App, receive notifications and tamper alerts straight to your smartphone, or chime notifications within your home, when the status of your door or windows change.

Feel secure with Sentry intelligent Windows and Doors in your home, when your new windows or doors are fitted, simply scan the QR code inside your window or door, click on the Yale / Sentry tab on the top left to see all the options, this will take you to a submenu page where you can access everything from where you can purchase your Sentry Sensors to the app store, tutorial videos, FAQ's and much more.

For orders to be eligible for "Lifetime Security Warranty", please note these goods need to have been specified as Secure by Design at the point of sale, together with an order placed to the manufacturer by the installation company stipulating the upgraded security options, this must include all high security Yale Hardware and 3 star door lock cylinders, the manufacturer is not responsible for the sale of goods to the consumer, this is the responsibility of the installation company to specify these products, no lifetime warranty is available for goods that have not been upgraded to Secure by Design Yale products at the point of order with the manufacturers.

"Please note, the Lifetime Security Warranty and extended mechanical warranty offerings are subject to installer application and being an approved installer of the scheme. It's the consumers responsibility to ensure that all products are maintained in conjunction with the maintenance guidelines together with the terms and conditions as set out in the Homeowner Guide, copies of which are available via the QR Code within your windows and doors. The warranty does not cover breakage or failure due to misuse or neglect of maintenance of any moving parts.

Please note, Bi-Folding Windows, Bi-Folding Doors, Tilt and Turn Windows, Stable Doors and Patio Doors are currently under development with Yale, however you can retrofit face fixed sensors which will enable you to upload these into your App for a full complement of products in your home. Please note, these products only display open and closed positions in your App. Available direct from Yale via the links in your QR Codes located inside your windows and doors.

French Windows

Similar to the styling of French doors, Sentry's French windows open out from the centre to offer a full-width opening and maximum light.

Offering a distinctive style, French windows are ideal as a fire escape. One sash carries with it the central mullion as the windows are fully opened, providing you with unrestricted access and views.

With high security locks, your security is assured - and child restrictors can also be added for peace of mind. Traditional or contemporary, French windows can be installed in a variety of locations and buildings.

Sentry French windows feature the patented bubble gasket used in all products, delivering a continuous seal, even in the corners. This results in draught-free, weather proof and leak-free windows. High performance energy ratings .

Size Limitations

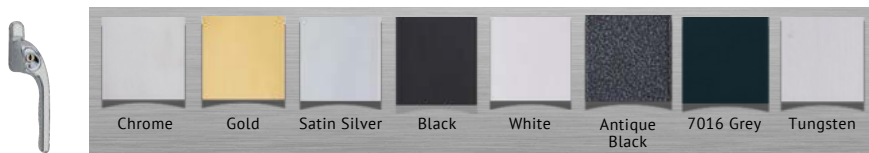

The maximum sizes stated below (mm) are based on 28mm 4-20-4 standard double glazed units within frames manufactured to the reinforcement guidelines.

CASEMENT TOP HUNG - {SASH SIZE}:
1265 w x 1342 h

CASEMENT SIDE HUNG - {SASH SIZE}:
715 w x 1342 h

Whilst we have the ability to manufacture outside these recommendation, please note we do so when asked but disclaim these on performance, therefor any sizes outside the maximum recommendations are excluded from the mechanical warranty.

Bow or Bay Windows

Sentry's innovative bow and bay window styles offer a number of features and benefits unrivalled in today's marketplace and are available in a range of options. A great way to bring more light into your home, a bow or bay window style utilises either a standard casement or flush sash window to form a collection of windows set together at an angle.

By choosing different styles, colours, glazing designs and handles, your bay or bow windows can be truly personalised for your home. Sentry's innovative design of the interior and exterior joint couplings prevents dust traps forming, making cleaning with a damp cloth quick and easy.

Size Limitations

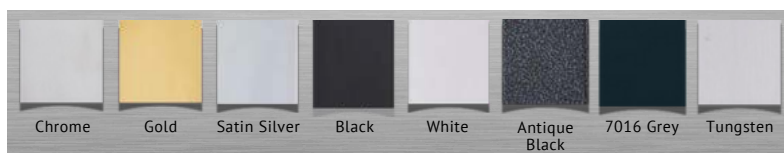

The maximum sizes stated below (mm) are based on 28mm 4-20-4 standard double glazed units within frames manufactured to the reinforcement guidelines.

French Doors

Slim sightlines and a 'floating' central mullion mean Liniar French doors are the ideal choice for a fully opening and secure entrance to your home. An attractive alternative to sliding patio or bi-folding doors, French doors can open inwards or outwards to suit your living space. Choose from Liniar's sculptured style for beautiful curves, or chamfered for a flat, more modern finish to your doors.

You could add sidelights for larger openings, and bevelled or patterned glass to add a distinctive style to your doors. Whichever design or colour you select; Sentry French doors can also be upgraded to a Secured By Design option, reassuring you of the highest security standards available (ask your installer for more information).

Outperforming most of the other leading brands, Liniar French doors can achieve a U-value as low as 1.0 W/m²K with triple glazing, ensuring the heat stays in your home.

Size Limitations

The maximum sizes stated below (mm) are based on 28mm 4-20-4 standard double glazed units within frames manufactured to the reinforcement guidelines.

Eco Door

Your front door is the face of your property. It's the last thing you see when you leave your home in the morning, the first thing you see when you arrive home in the evening and the sight that welcomes your visitors, setting their first impression.

Thermal Performance

Eco composite doors are thermally efficient by design

The warm foam core allows the door to have a significantly better 'U' value than any other option on the market, meaning your entranceway is more thermally efficient with Eco Door. Our full door range complies with Document L and the requirements of the current Building Regulations.

ModLok™ Innovative Hybrid Bi-Folding Doors

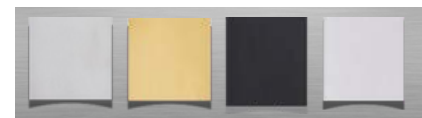

Sentry's second generation bi-fold combines the structural benefits of an aluminium door set with the thermal efficiency of PVCu up to 7 panes wide. The Sentry Modlok™ bi-folding door includes a seamless reinforcing and locking mechanism.

This not only offers the highest security standards, but enables the doors to span even larger and wider sizes. Built in anti-lift features and anti-bump cylinders combine to bring you peace of mind. Modlok™ also offers enhanced security features, including three opposing hooks and two shootbolts built in to every master door, plus two anti-lift shootbolts on every slave door. The exo-skeletal system ensures only the master door will open first, so there's no chance of spraining locks by trying to open the wrong door - and folding keys mean no dents!

With Sentry's foiled woodgrain-effect options, your bi-folding doors can emulate the natural look of timber. The Sentry Modlok™ bi-fold can achieve a supremely energy efficient U-value of 1.0 W/m2K with triple glazed units.

ERA

The unique design of the ModLok™ Bi-Fold earned the doors a Queen's Award for Enterprise in Innovation, making Liniar one of only approximately 1,400 companies bestowed with the honour in its 51 year history.

For orders to be eligible for "Lifetime Security Warranty", please note these goods need to have been specified as Secure by Design at the point of sale, together with an order placed to the manufacturer by the installation company stipulating the upgraded security options, this must include all high security Yale Hardware and 3 star door lock cylinders, the manufacturer is not responsible for the sale of goods to the consumer, this is the responsibility of the installation company to specify these products, no lifetime warranty is available for goods that have not been upgraded to Secure by Design Yale products at the point of order with the manufacturers.

"Please note, the Lifetime Security Warranty and extended mechanical warranty offerings are subject to installer application and being an approved installer of the scheme. It's the consumers responsibility to ensure that all products are maintained in conjunction with the maintenance guidelines together with the terms and conditions as set out in the Homeowner Guide, copies of which are available via the QR Code within your windows and doors. The warranty does not cover breakage or failure due to misuse or neglect of maintenance of any moving parts.

Please note, Bi-Folding Windows, Bi-Folding Doors, Tilt and Turn Windows, Stable Doors and Patio Doors are currently under development with Yale, however you can retrofit face fixed sensors which will enable you to upload these into your App for a full complement of products in your home. Please note, these products only display open and closed positions in your App. Available direct from Yale via the links in your QR Codes located inside your windows and doors.

Patio Doors

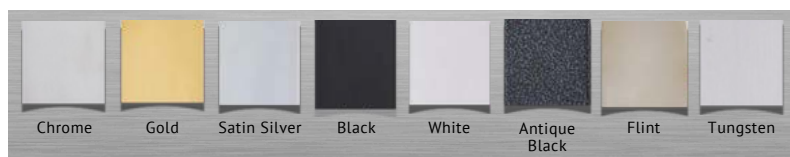

Whether you're looking for a brand-new patio door to provide better access to your garden, or you're looking for a replacement door, you'll be amazed, the traditional sliding patio door has been given a new lease of life by Liniar. From the moment you see the Liniar sliding patio door, you'll be struck by the robust, ergonomic design, the effortless opening mechanism and smooth motion.

With sculptured features providing a beautiful finish, Liniar's patio doors include hidden 'crash stops' within the operating mechanism, resulting in sleek, attractive lines. Slim PVCu sightlines also ensure you can enjoy the maximum amount of natural light in your home.

With a wide choice of colour options, you can personalise your door to match the rest of your home, making it seem like it was designed just for you!

Patio Doors

As standard, your windows and doors have been manufactured intelligent ready, approved by Yale we are delighted to demonstrate The Sentry Windows and Doors, please scan the QR Codes for in house demonstrations on how you can upgrade a host of different options.

Is my home safe and secure?

Know the answer, at home or away, with Sentry Intelligent Windows and Doors, approved by Yale. Sentry Intelligent Sensors put you in control of your home security, monitor the status of your doors and windows from anywhere, or at any time, via the Yale Smart Living Alarm App, receive notifications and tamper alerts straight to your smartphone, or chime notifications within your home, when the status of your door or windows change.

Feel secure with Sentry intelligent Windows and Doors in your home, when your new windows or doors are fitted, simply scan the QR code inside your window or door, click on the Yale / Sentry tab on the top left to see all the options, this will take you to a submenu page where you can access everything from where you can purchase your Sentry Sensors to the app store, tutorial videos, FAQ's and much more.

Alumina Doors

Made from aluminium, the Alumina by Linar range delivers high thermal efficiency with the only sculptured aluminium bi-fold created to fully match PVCu windows.

The very latest product development from Linar, the Alumina bi-fold was created to offer a true aluminium bi-fold for large apertures where the panes can reach up to 2.5m high for floor-to-ceiling glass.

The only fully sculptured aluminium bi-fold doors on the market, Alumina will match the exact shape of Linar sculptured windows, with the features symmetric to your windows and doors, you can choose to have your alumina doors in a foiled finish to provide you with a seamless colour match to your windows and doors, that no other aluminium door can offer.

With the same hardware as the ModLok™ bi-fold system you can rest assured of the highest security features, including three opposing hooks and two shootbolts built into every master door, plus two anti-lift shootbolts on every slave door.

Designed from the ground upwards with thermal efficiency firmly in mind, the Alumina system breaks the usual rules of standard aluminium bi-fold doors and addresses tomorrow's performance requirements today. An innovative combined lock and thermal insert, or barrier, gives the Alumina door a supremely high energy rating and U-values as low as 1.2 W/m²K. The Linar design team has combined the ultimate specification of security with a high strength engineering polymer lock body – so the lock itself acts as a thermal break, boosting the door's thermal performance compared to traditional aluminium doors.

With configurations spanning up to 7 panes across, and each individual sash up to 1.2 metres wide and 2.5 metres high, your Alumina bi-folding door can open up an entire wall of your home up to 6 metres in width.

Also available as single door or French door sets.

Garden Rooms

We are delighted to announce the latest exciting addition to our product portfolio, Liniair's garden room range - Spaces.

On request we can provide access to a bespoke Spaces Visualiser online design tool, complete with links for your website and social media platforms.

This technology enable consumers to design and accurately price their specific garden room requirements via your website. It also allows them to send a code to their phone or tablet and view their Spaces garden room to scale in its intended setting via augmented reality, and even take a virtual 'walk around' inside.

Conservatories

The energy efficient Sentry conservatory

Create additional space in your home with a fully matching conservatory.

Sentry's EnergyPlus conservatory roof is available in a stunning range of colours from stock and is designed to match perfectly with the rest of the Linar window and door ranges. With a host of patented innovations, including twin-walled EnergyPlus top caps, patented glazing slip prevention (patent granted: GB2378207) and built-in security features, a Linar conservatory will add value to your home and offer additional space for you and your family to enjoy, all year round. Each Linar conservatory is lovingly designed and built to your specific requirements and is available in a wide number of styles, shapes and configurations. Your Sentry installer will be pleased to discuss your options and help you design your dream conservatory.

Roof styles

Edwardian

Also known as Georgian, this style is square or rectangular with a high, sloping roof. Its imposing style and finishing touches allow you to maximise your living space.

Lean-to

This style offers a simple, cost effective solution for bungalows and porches, allowing maximum space in an economical style, and is often a popular choice.

The Sentry conservatory

Everything you need for the perfect conservatory - all matching from Sentry.

A conservatory is made up of several different components – usually brick walls or PVCu panels, with windows above, an entrance door to link it to your home and an exit door to open it up to your garden – along with a roof.

On the exterior you'll see guttering and drainpipes, together with a decorative finish to the roof's apex.

Gable

Fully glazed right up to the apex, this style also has a square or rectangular footprint. Offering a stunning impact, this is often called the 'sun burst effect'.

Combination

Offering the ultimate in flexibility, this style combines one or more styles to create the perfect shape for your home and garden.

Double hipped

With a pitched roof on both sides, this style strikes the perfect balance between style and a seamless fit with your home. The front facing pitched roof fits with most properties.

Victorian

One of the most popular styles of conservatory, the Victorian consists of a bay front, a steeply pitched roof and ornate ridge details – with either three or five facets.

Why choose a Sentry conservatory?

Thermally efficient, your Sentry conservatory can be used all year round.

- Fully bespoke, each roof is individually designed and built just for you.
- Patented design features help to make the system 'best in class'.
- Matches perfectly with the Linar window range for a beautiful finish.
